The NASA STI Office ... in Profile

Since its founding, NASA has been dedicated to the advancement of aeronautics and space science. The NASA Scientific and Technical Information (STI) Office plays a key part in helping NASA maintain this important role.

The NASA STI Office provides access to the NASA STI Database, the largest collection of aeronautical and space science STI in the world. The Office is also NASA's institutional mechanism for disseminating the results of its research and development activities.

Specialized services that help round out the Office's diverse offerings include creating custom thesauri, translating material to or from 34 foreign languages, building customized databases, organizing and publishing research results ... even providing videos.

For more information about the NASA STI Office, you can:

- **Phone** the NASA Access Help Desk at (301) 621-0390
- **Fax** your question to the NASA Access Help Desk at (301) 621-0134
- **E-mail** your question via the **Internet** to help@sti.nasa.gov
- **Write** to:

Scientific and Technical Aerospace Reports

Scientific and Technical Aerospace Reports (STAR), is published each month as a major product of the NASA Scientific and Technical Information (STI) Office.

Inside this issue you will find:

- **Front Matter** containing a typical citation and abstract sample explaining the standard format, including codes for ordering reports
- **An Abstract Section** containing citations and abstracts of reports and publications that provide comprehensive coverage of worldwide aerospace-related topics including aeronautics and space science technology. *STAR* lists published and publicly available reports entered into the NASA STI Database during the four weeks preceding publication of this issue. These citations and abstracts are listed by subject categories.
- **An Index Section**
  - Subject
  - Personal author
  - Corporate source
  - Contract number
  - Report number
- **An Appendix** containing a guide for ordering cited reports, registering with the NASA STI Office, and using the available products and services. Additionally, price schedules, phone numbers, and addresses are included in this information packed section.

NASA also sponsors the companion journal, *NASA Open Volumes on Aerospace (NOVA)*, which lists abstracts of the open literature on aerospace subjects available worldwide. *NOVA* is for internal NASA use only, available from the NASA Center for AeroSpace Information (CASI).

Entries found in *STAR* are available through the NASA online retrieval service, RECON.

The NASA STI Office gathers information through national and international agreements and exchanges and makes this information available to the NASA community and to the public in many forms through various outlets.

For additional information on the NASA STI Office, call the NASA Access Help Desk at (301) 621-0390, or write to:

SPECIAL NOTICE

The abstract sections of the monthly *STAR* journals can be bound separately. Individual abstracts can be located readily by means of the page numbers given at each entry, e.g., p 3181. To assist the user in binding *STAR* Volume 32, two (2) title pages are included in the back of Part Two.

This publication was prepared by the NASA Center for AeroSpace Information,

INTRODUCTION

WHAT *STAR* ANNUAL INDEXES ARE

This Annual Index is an edited consolidation of the indexes to the individual issues of *Scientific and Technical Aerospace Reports (STAR)* for the calendar year 1994 (Volume 32 Numbers 1 through 12). For the convenience of the user, it is divided into four parts, each bound separately. Part One contains the Subject Index (A-LES). Part Two contains the Subject Index (LET-Z). Part Three contains the Personal Author Index. Part Four contains the Corporate Source Index, Contract Number Index, and Report Number Index. The Annual Index supersedes the monthly indexes previously issued during 1994.

Each entry in this index includes a group of identifying numbers in the following form: 09 p. 3656 N94-32103. The first two digits (09) identify the issue in which the document was announced. The "p" and the four digits that follow (3656) refer to the page number, in the designated issue, on which the abstract of the document appears. The next group of numbers (N94-32103) is the NASA Accession Number, a unique identification number assigned by NASA to each document that was acquired, indexed, and announced in *STAR* during the year.

In addition to these identifying numbers each entry in the Subject Index contains a title, or title and title extension. Each entry in the Personal Author and Corporate Source Indexes contains the title.

At the beginning of each index in this cumulation, a typical listing is illustrated with each of its elements identified to assist the reader in using the different types of index entries.

HOW TO USE THE SUBJECT INDEX

Subject terms in this cumulative index are arranged alphabetically, and are supplemented with cross-references which are intended to serve as directions that will enable the user to modify, enlarge, or narrow his search in accordance with his specific interest. The subject headings have been selected from the latest revision of the *NASA Thesaurus*. Two types of cross-references are used:

1. Use (U) references direct the user to alternate headings under which materials on the subject may be found. For example:

   ANNULAR JETS
   U ANNULAR FLOW
   U JET FLOW
   COLUMBIUM
   U NIOBIUM

2. Narrower Term (NT) references refer the user to more specific headings in the same subject area, under which additional material on the subject may be found. For example:

   EMISSION
   NT ELECTRON EMISSION
   NT NEUTRON EMISSION
   NT THERMAL EMISSION

Finally, a searcher should use the titles or title and title extensions in the index to narrow further his quest for particular items. This is because subject terms can readily refer to more than one class of document. For example:

CATHODES
Cesium plasma cathodes as sources of high intensity electron beams
Cathode material testing in electrochemical half cells

HOW TO USE THE PERSONAL AUTHOR INDEX

All personal authors identified in the abstract section citations in the individual *STAR* issues appear in this index. Differences in transliteration schemes may require multiple searching of the index for variants of an author's name. For example:

EMELIANOV, M. D.
and
YEMELYANOV, M. D.

HOW TO USE THE CORPORATE SOURCE INDEX

The corporate source index entries are abridged versions of the corporate sources used in the abstract section citations in the individual issue supplements. The corporate source supplementary (organizational component) does not appear in the index. For example:

PRINCETON UNIV., N.J. DEPT. OF CHEMICAL ENGINEERING
(Source citation entry)
PRINCETON UNIV., N.J.
(Source index entry)

HOW TO USE THE CONTRACT NUMBER INDEX

All contract numbers that are identified in the abstract section citations in the individual *STAR* issues appear in this index. Changes by agencies in the style in which contract numbers are presented may require multiple searching for variants. For example:

AF 33(615)-67-C-1758
F33615-67-C-1758

HOW TO USE THE REPORT NUMBER INDEX

All report numbers that have been assigned by the corporate source, monitoring agency or cataloging activity appear in this index. Variations in initial input may result in different report number series. For example:

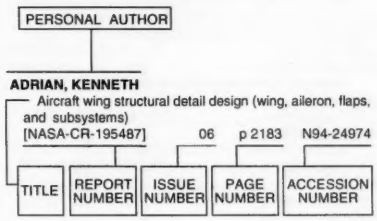
TP-924
ONERA-TP-924

A COMPREHENSIVE INFORMATION SERVICE

The National Aeronautics and Space Administration makes the results of worldwide research and development activities in aeronautics, space, and supporting disciplines promptly available to participants in its program. NASA's scientific and technical information system now contains over three million documents, which are abstracted, indexed, and obtained through retrieval and dissemination services. These services which include the abstract journal, *Scientific and Technical Aerospace Reports (STAR)*, are described fully in a bulletin, *The NASA Scientific and Technical Information System...and How to Use It*, available at no charge from the NASA Center for AeroSpace Information, 800 Elkridge Landing Road, Linthicum Heights, MD 21090-2934, phone: (301) 621-0390, through the Internet: help@sti.nasa.gov, or fax: (301) 621-0134.

AVAILABILITY OF DOCUMENTS

Information concerning the availability of documents announced in the *STAR* issues covered in this index can be found in a current issue.



FEDERAL DEPOSITORY LIBRARY PROGRAM

In order to provide the general public with greater access to U.S. Government publications, Congress established the Federal Depository Library Program under the Government Printing Office (GPO), with 53 regional depositories responsible for permanent retention of material, inter-library loan, and reference services. At least one copy of nearly every NASA and NASA-sponsored publication, either in printed or microfiche format, is received and retained by the 53 regional depositories. A list of the regional GPO libraries, arranged alphabetically by state, appears on the inside back cover. These libraries are *not* sales outlets. A local library can contact a Regional Depository to help locate specific reports, or direct contact may be made by an individual.

PUBLIC COLLECTIONS OF NASA DOCUMENTS

An extensive collection of NASA and NASA-sponsored publications is maintained by the British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England for public access. The British Library Lending Division also has available many of the non-NASA publications cited in *STAR*. European requesters may purchase facsimile copy or microfiche of NASA and NASA-sponsored documents, those identified by both the symbols # and * from ESA–Information Retrieval Service European Space Agency, 8-10 rue Mario-Nikis, 75738 CEDEX 15, France.

Typical Personal Author Index Listing

Listings in this index are arranged alphabetically by personal author. Titles, without title extensions, are provided under each personal author entry. The report number helps to indicate the type of document cited (e.g., NASA report, translation, NASA contractor report). The issue and page number identify the *STAR* issue in which the document was announced and the page on which the citation appears. The accession number denotes the number by which the citation is identified on that page. The listings are arranged under each personal author in ascending accession number order.
